

## AI-Enabled Thermal Imaging Analytics for Rapid Temperature Detection

Achieve rapid social health screening with a customized Thermal camera paired with a 1080 bullet and a Video Intelligence Platform. Ideal for social environments, including schools, manufacturing plants, warehouses, transit stations, hospitals, gyms, banks, theaters – just about any environment or facility that needs to screen for high temperatures during this unprecedented health crisis.

Face Mask Detection

Temperature Detection

Distancing Detection

Occupancy Detection

### Features:

- Scans at normal walking speed
- > 100 persons per minute
- No need to stand in front of the camera
- Detects temperature with a Face mask on
- Software-based Black Body
- Face distance from camera 10 – 12 feet
- Manual/personnel overhead eliminated
